WORK EXPERIENCE

UI Internship

Liferay

02/2020 – 05/2020

Diamond Bar, CA

- Created a reusable, editable Liferay Theme template using FreeMarker, JavaScript, and SASS
- Used scripting languages, management tools, content creation tools, applications, and digital media when resolving tickets
- Collaborated with Business and UX Team to plan and resolve tickets created during sprint planning
- Integrated RESTful API services into front-end clients
- Maintained an understand of the latest web applications and programming practices through education, study, and participation in workshops and team huddles
- Developed and validated test routines and schedules to ensure that test cases mimic external interfaces and address all browser and devices

Web Developer

Huntington Digital

08/2019 – 02/2020

Irvine, CA

- Designed wireframes and mock-ups using FIGMA focusing on user-centered designs
- Converted wireframes into prototypes and MVPs using HTML, SASS, JavaScript, jQuery, PHP, and AWS or Netlify
- Created and tracked objectives using task tracking allowing for time optimization and producing deliverables consistently ahead of schedule
- Created dynamics pages and blogs using serverless backend services
- Setup a code review process using Git allowing for clean project history
- Finished websites brought live using AWS EC2, Heroku, or Netlify

Web Developer

Peak Meditation

05/2019 – 08/2019

Irvine, CA

- Designed mockup for overall website design after discussing needs with CEO and other stakeholders
- Created Landing and event pages using React and Next.js
- Provided CEO with email lists once a week using PHP and PHPMailer

Client Services Marketing Manager

Ingram Micro

11/2016 – 02/2019

Irvine, CA

- Lead 5-month social media campaign as a project lead that received accolades from top level Juniper Executives
- Created and presented custom quarterly ROI reports to high level executives and respective vendors
- Developed, executed, and managed a variety of digital and event-based marketing campaigns

APPS DEVELOPED

Buddy Board (WIP) [Github](#)

- Created to allow users to create and solve rock climbing problems on their home walls
- Created with React, Bootstrap 4, Node, Express, MySQL
- Uses Redux for user authentication

Run Tracker [Live](#) | [Github](#)

- Used React and Redux for user authentication and allows for permanent login
- Created MySQL queries to allow users multiple CRUD functionalities throughout the app
- Used PHP for the backend and made calls using Axios
- Utilized SASS and Bootstrap to create a clean mobile responsive design

Education

University of Southern California

Bachelor's Degree – Business Administration
